# COVID-Impfung

## Vormerkplattform und Informationen

### **Pre-Registration system for an efficient carrying out of the vaccinations**

The website for pre-registration has been online since Monday (18th of January 2021) 9 o'clock. All people of Vorarlberg, 16 years of age and older can register for the voluntary and free of charge coronavirus-vaccination.

[Link to the registration-website](https://impfung.lwz-vorarlberg.at/GesundheitVaccinate/Covid/Register) or <https://impfung.lwz-vorarlberg.at/GesundheitVaccinate/Covid/Register>

If you don't have access to the internet and own no email address we ask you to turn to family members or friends to help you with the registration on the website. In case you do not have that option either, you can call the **service hotline 0800-201 361** to get support for the pre-registration.

If/when vaccines and appointments are available, people who pre-registered will be notified and given the chance to make an individual appointment.

### **Priority for people with pre-existing medical conditions**

All high-risk patients and people with pre-existing conditions are requested to complete their personal registration for vaccination together with their physician. For reasons of privacy, only physicians/doctors are permitted to make priority-marked registrations in the system.

Patients can either register themselves and request their physician/doctor to add a priority code afterwards, or just ask their physician/doctor to do the registration.

When arranging appointments, persons with pre-existing conditions and high-risk patients will be given priority - the registration-platform is not designed as a traditional waiting list. If/when vaccines are available, appointments will be arranged on a priority basis, meaning that parameters such as age and pre-existing conditions are key and not the time at which someone registered.

Depending on the availability of the vaccine and on prioritization, it might be a while before you are notified after having filled out the registration.

The age restriction is necessary because the vaccine by Biontech/Pfizer is permitted only for persons 16 years of age and older, the vaccine by Moderna is permitted for persons 18 years of age and older. Pre-registered persons will be notified immediately once vaccines and appointments are available.
